Enexis Holding N.V.

Update to credit analysis

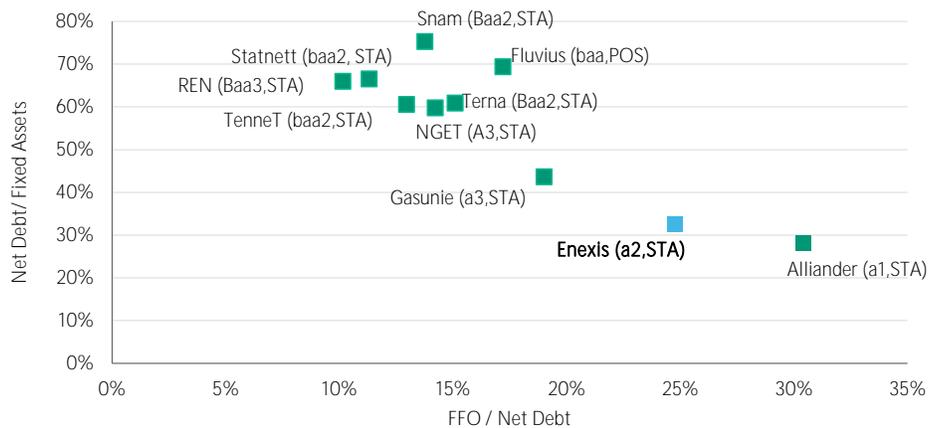

Summary

The credit quality of [Enexis Holding N.V.](#) (Enexis, Aa3 stable) is underpinned by (1) the low-risk business profile of its domestic electricity and gas distribution network operations, which generate more than 90% of earnings and cash flow; (2) a well-defined and transparent regulatory framework; and (3) the company's balanced financial profile, with relatively modest leverage for the sector and solid liquidity position.

The company has historically maintained a strong financial profile, but we expect a modest decline in the medium term because of further falls in regulatory allowed returns and growing capital spending, primarily related to facilitating delivery of country's ambitious energy transition objectives. Nevertheless, the company's financial metrics will remain strong compared with those of other European networks.

Exhibit 1

Modest leverage, compared with that of its European peers, supports strong standalone credit quality

Ratings are the standalone credit quality, expressed as assigned final rating or Baseline Credit Assessment where applicable. NGET - National Grid Electricity Transmission.

Source: Moody's Investors Service

The Aa3 rating incorporates a two-notch uplift from Enexis' standalone credit quality, reflecting the likelihood of extraordinary financial support being provided by its owners — the largest of which is the Province of Noord-Brabant, holding around 31% of Enexis' shares — if ever required.

Credit strengths

- » Low business risk of monopoly distribution network activities, with limited contribution from unregulated businesses
- » Stable and transparent regulatory regime
- » Modest leverage, compared with that of the wider peer group
- » Expectation of strong support from local government shareholders, given the essentiality of assets

Credit challenges

- » Reductions in allowed returns have reduced financial flexibility
- » Increasing capital spending requirements support the country's energy transition
- » Gas networks face stranded asset risk in the context of energy transition, although the regulator is considering options to alleviate its impact
- » Continued low interest rate environment could lead to a further reduction in allowed return in the next regulatory period (2022-26), depressing cash flow based metrics

Rating outlook

The stable outlook reflects our expectation that Enexis will continue to derive most of its revenue and cash flow from low-risk regulated activities and maintain a financial profile in line with our minimum guidance for the current rating.

Factors that could lead to an upgrade

An upgrade of the final rating is considered unlikely at this time, taking into account the expected modest weakening in Enexis' financial profile as a result of decreasing allowed returns during the current regulatory period and the increase in capital spending requirements intended to facilitate delivery of country's ambitious energy transition objectives.

Factors that could lead to a downgrade

A rating downgrade could be triggered if Enexis fails to maintain the following minimum credit metrics: funds from operations (FFO)/net debt in the mid-to-high teens and net debt/fixed assets no higher than the low 50s, both in percentage terms.

The Aa3 rating could also be subject to downward pressure if our view of the credit profile of the municipalities and provinces owning Enexis or our assessment of extraordinary support changes.

Key indicators

Profile

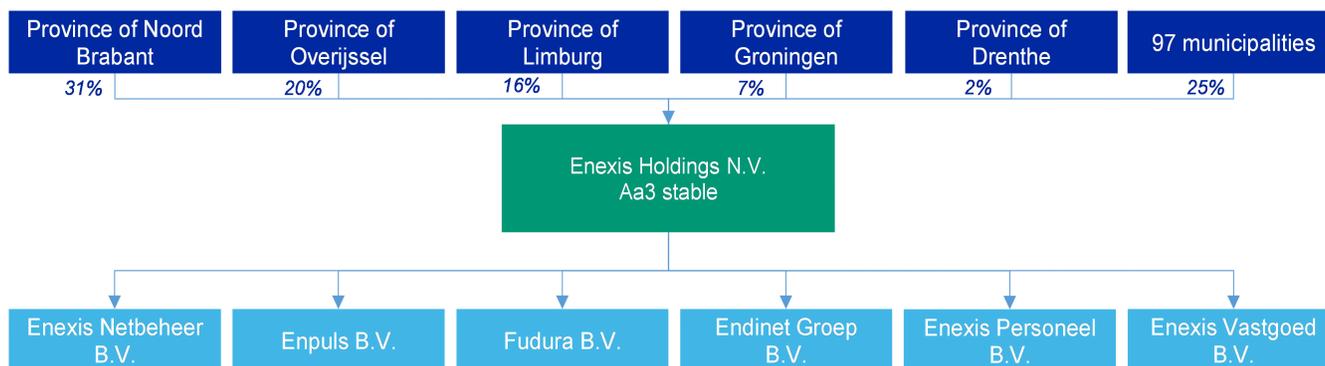

Enexis Holding N.V. (Enexis) is a holding company of Enexis Netbeheer B.V. (previously Enexis B.V.), which provides the regulated activities of owning and managing the gas and electricity distribution networks in several Dutch regions, covering around 31% of the country. The group's regulated activities generate more than 95% of revenue and represent 90% of group assets and liabilities. The Enexis group is one of the three largest electricity and gas distribution network operators in the Netherlands, responsible for the maintenance, management and development of the medium-voltage electricity and gas distribution grids. It operates around 139,900 kilometres (km) of electricity cables and 46,400 km of gas pipelines, delivering electricity to around 2.8 million customers and gas to 2.3 million customers.

Enexis is also the holding company for non-regulated entities including Enpuls B.V., which focuses on innovation in relation to the energy transition; Fudura B.V., which provides non-regulated energy management solutions; and two subsidiaries (Enexis Personeel B.V. and Enexis Vastgoed B.V.) that support the group in human resources and property management.

Enexis is owned by the five Dutch provinces (together owning 75.6%; Noord-Brabant (31%), Overijssel (20%), Limburg (16%), Groningen (7%) and Drenthe (2%)) and 88 municipalities (24.4%) of its service area.

Exhibit 3

Simplified organisational structure of the Enexis group

Following its acquisition in January 2016, Endinet Groep B.V. has been almost completely integrated into the Enexis companies as of 31 December 2018.

Sources: Enexis, Moody's Investors Service

Detailed credit considerations

Low business risk, underpinned by regulated cash flow

Enexis' core business activities relate to low-risk monopoly network operation. These activities generate predictable cash flow over the medium- to long-term and provide good visibility into future funding requirements.

Less than 10% of Enexis' revenue is derived from other utility services. These non-regulated businesses are complementary to the core activities and include the Fudura energy services brand.

Established regulatory framework, but returns continue to decline

The Dutch regulatory framework, applied since 2000 and 2001 for electricity and gas networks, respectively, allows the country's distribution network companies to earn a return on their regulated asset base and provides allowances for costs adjusted for consumer price index inflation and an efficiency incentive factor. The regulation incorporates incentives determined using a "yardstick" mechanism, which defines the cost efficiency and quality factors based on industry averages and encourages network companies to improve profitability by outperforming the sector. This approach is typical among regulatory regimes in Europe, and we consider that the application by the Dutch regulator, the Authority for Consumers and Markets (ACM), has been transparent and consistent to date.

The current regulatory period for both electricity and gas distribution runs from January 2017 to December 2021. The Method Decisions, the ACM's final determination, were published in September 2016 and originally included a gradual reduction in the allowed return (weighted average cost of capital, WACC) from 4.3% to 3.0% (both pre-tax, real) by 2021. Following successful appeals from DSOs, new Method Decisions were published in January 2019 with the average WACC unchanged over the period but starting and finishing 20 basis points higher and lower respectively, as Exhibit 4 shows. However, allowed revenues over the regulatory period for the DSOs will be unaltered as a result of this change, due to the 'reformation in peius' principle (see highlight box below).

Exhibit 4

Allowed return for Dutch network operators shows a declining trend

WACC - Dutch DSOs	2008-2010	2011-2013	2014-2016	2017	2018	2019	2020	2021

Nominal Cost of Equity	8.30%	8.00%	5.55%	5.12%	5.02%	4.92%	4.82%	4.72%
gearing assumption	60%	55%	50%	50%	50%	50%	50%	50%
tax rate	25.5%	25.5%	25.0%	25.0%	25.0%	25.0%	25.0%	25.0%
Nominal WACC pre-tax	7.3%	7.8%	5.6%	5.1%	4.9%	4.7%	4.5%	4.3%
inflation	1.75%	1.55%	2.00%	0.90%	1.03%	1.16%	1.29%	1.42%
Real WACC pre-tax	5.5%	6.2%	3.6%	4.16%	3.82%	3.48%	3.14%	2.80%

Note: (1) The calculation for the 2017-21 period reflects the amended Method Decisions published in January 2019. (2) The real WACC pre-tax for the 2017-21 regulatory period under the original Method Decisions was 4.04% 2017, 3.78% 2018, 3.52% 2019, 3.26% 2020 and 3.00% in 2021.

Source: ACM, Moody's Investors Service calculation

Amendment to the Method Decisions has a neutral impact over the period but is still subject to appeal

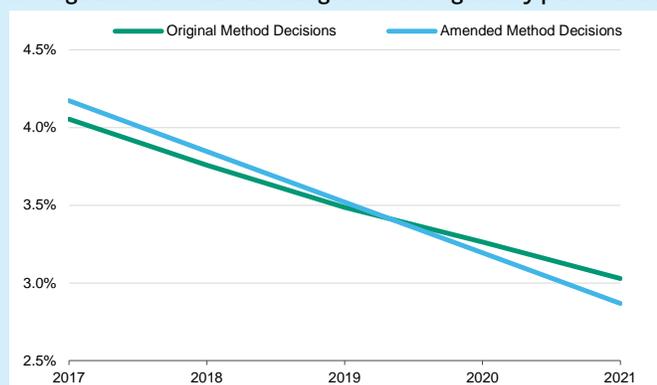

All DSOs appealed the Method Decisions published in September 2016 to the Trade and Industry Appeals Tribunal (CBB), which annulled the Method Decisions on 24 July 2018 and ruled that:

- » one of the comparators used in the peer group to compute the asset beta (Fluxys) should be removed, impacting the asset beta and in turn the allowed equity return
- » net debt rather than gross debt should be used when assessing gearing, primarily affecting the assumed gearing level (net debt is lower than gross debt and, since allowed equity returns are higher than the allowed cost of debt, this would increase allowed returns) but also the asset beta and, in turn, the equity beta and allowed equity return

On 24 January 2019, the ACM published amended Method Decisions for Dutch network operators for the 2017-21 regulatory period. Exhibit 5 compares the WACC between the original and the Amended Method Decisions including the CBB recommendations as well as an update of the reference period for the calculation of WACC components, which partially offset the effect of some changes required by CBB.

Exhibit 5

Average allowed return unchanged for the regulatory period as a result of the new Method Decisions

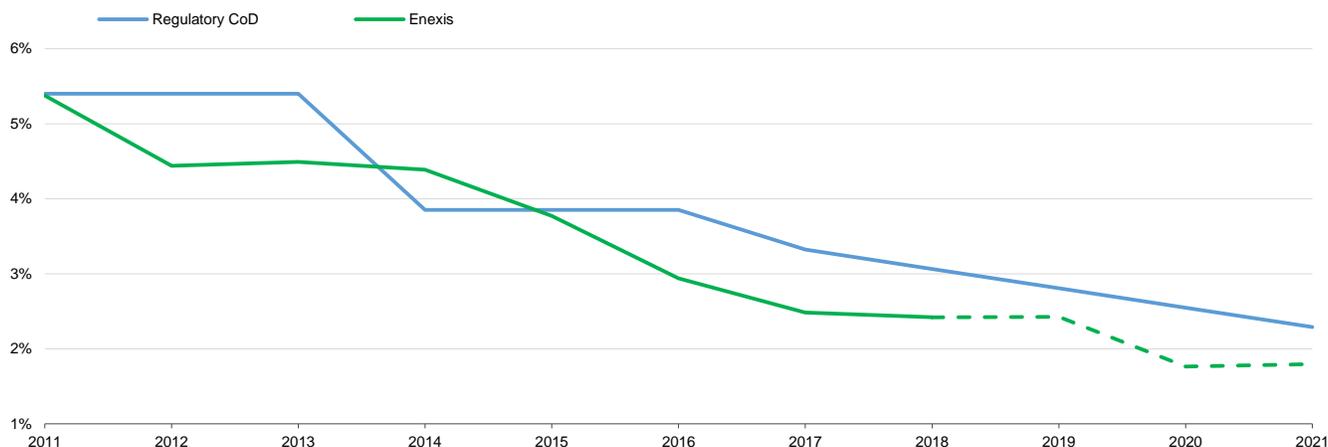

Sources: ACM, Moody's Investors Service calculation

Typically, when new Method Decisions are published, the full change in allowed revenues over the regulatory period to-date is reflected in tariffs at the first opportunity, i.e. in 2020 tariffs for the years from 2017-20 inclusive, with the change in subsequent years, here 2021, reflected in those tariffs. Whilst the change in the profile of allowed returns, and thus allowed revenues, resulting from the new Method Decisions would result in a slight reduction of total allowed revenue over the regulatory period, we expect no change in total allowed revenues for distribution network operators as an appellant cannot be worse off than if they had not appealed (the 'reformation in peius' principle) and network operators were the only party this aspect of the Method Decisions. We note several appeals have been lodged by network operators against the changes to the WACC in the amended Method Decisions and are under review by the CBB, with the CBB's decision expected by summer 2019.

The reduction in allowed returns is less material than for the 2014-16 regulatory period where it fell from 6.2% to 3.6% (both pre-tax, real) in linear steps. Enexis has demonstrated its ability to operate within the bounds of the regulatory return allowance and to fund comfortably within the cost of debt assumed by the regulator. We expect Enexis' cost of external debt to remain within the allowed cost for the period, supported by ongoing refinancing and new funding for its investment programme.

Exhibit 6

We expect Enexis to continue to outperform the regulatory cost of debt allowance over the remainder of the current regulatory period

Moody's estimate includes Enexis' refinancing needs and new funding required to support the increase in investments at current interest rate curves; Moody's estimate assumes refinancing of existing shareholder loans in 2019 with senior unsecured debt.

Sources: ACM, Enexis, Moody's Investors Service

The regulator also imposes a series of cost-efficiency targets on the networks, which, combined with the allowed return, determine the so-called X-factor, currently set at 2.13% for electricity and 1.54% for gas annually for Enexis (previously around 5% and 7%, respectively). While base costs were reset on the basis of average efficient costs in the 2013-15 period, resulting in an increase in the overall revenue allowance for 2017-21, the forward-looking operating efficiency targets embedded in the X-factor may still prove challenging.

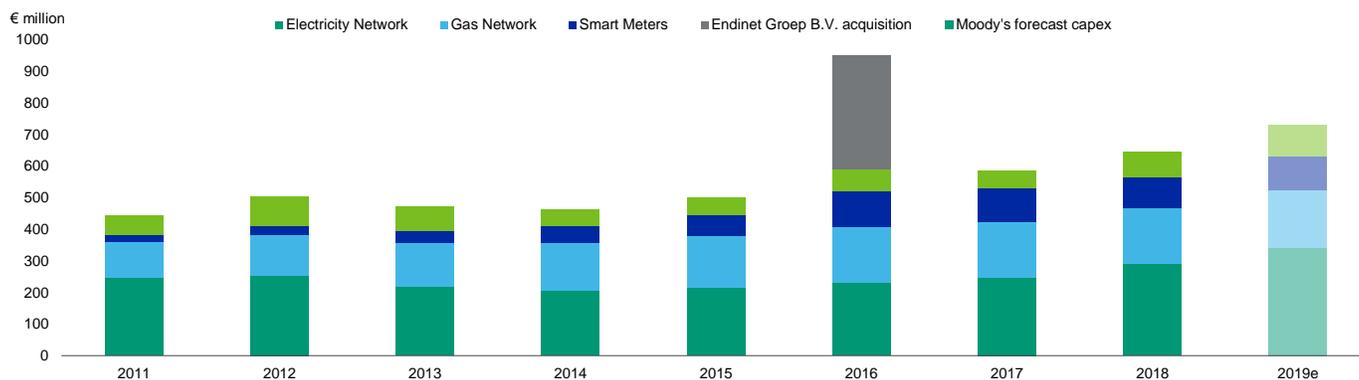

National energy transition plan raises capital spending and brings challenges for the next regulatory period

The Netherlands has committed to ambitious climate change targets for 2020, including a 16% reduction in greenhouse gas emissions, compared with the 2005 levels, and 14% of gross final energy consumption from renewable energy. Progress has been slow and the Netherlands shows the largest gap between actual and planned renewable energy development in the European Union, with an actual average share of renewables of 5.9% for 2015-16, compared with an indicative trajectory of 7.6%.

In July 2018, a coalition of seven Dutch political parties, which together have around 75% of the seats in Parliament, unveiled an ambitious climate policy (Climate Agreement) proposal. If passed as proposed (a final agreement is expected around summer 2019), it would commit the Netherlands to (1) by 2030, a 49% reduction in CO₂ emissions (relative to 1990 levels); and (2) by 2050, a 95% reduction in CO₂ emissions (relative to 1990 levels) and the generation of all electricity carbon neutrally.

Delivering these targets would require a significant acceleration of the energy transition across many areas that would result in material incremental capital spending for Enexis in the 2020s, including on new connections for local renewable generation (primarily solar and onshore wind), reinforcing the grid to cope with the growth in electric vehicles and the heat transition. Enexis has reported that combined with the shortage of skilled labour force, shortage of grid capacity has led to some delay in connecting renewables to the grid.

Exhibit 7

Enexis will have to increase its capital spending to support the country's energy transition

Source: Enexis, Moody's investors Service

As illustrated by the cancellation of the requirement to provide compulsory gas connections to new residential areas, the Netherlands is moving away from natural gas towards more sustainable sources of energy, which raises the risk of stranded assets for gas networks. The ACM is considering its impact on gas networks' allowed revenue for the 2022-26 regulatory period through the Morgan project and should start a consultation process on this subject in 2020. In parallel, the ACM is conducting analyses on alternative uses of the gas network, such as green gas and hydrogen.

The country is contemplating developing its district heating infrastructure. While the activity does not benefit from a similar regulatory framework as electric or gas networks, some Dutch network operators such as Enexis could decide to have a role in its operation.

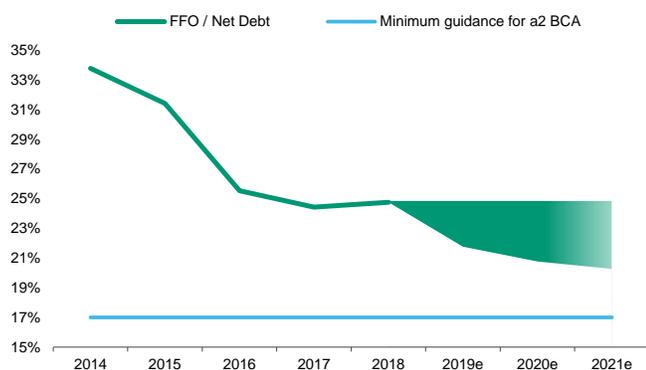

Modest leverage, compared with peers, supports strong standalone credit quality

Like its closest peer [Alliander N.V.](#) (Aa2 stable), Enexis exhibits a strong financial profile with modest financial leverage compared with the wider European peer group of energy network companies. Over the next three to four years, we expect Enexis' metrics to weaken, with the reduction in allowed returns (itself a reflection of the continued low interest rate environment) and increasing investment requirements to support delivery of the country's energy transition.

Nevertheless, overall leverage will remain modest in the wider European context. We forecast Enexis will maintain FFO/net debt in the low- to mid-20s in percentage terms and net debt/fixed assets below 40% until the end of the regulatory period. The robust financial profile is also supported by a comparably modest dividend policy, with a payout ratio of around 50%, and an implicit commitment to shareholders to maintain an absolute dividend level of around €100 million on a best-efforts basis.

Exhibit 8

We expect a decline in cash flow because of lower returns... FFO/net debt against ratio guidance

Final rating incorporates two notches of rating uplift

Given its 100% ownership by Dutch provinces and municipalities, Enexis falls within the scope of our [Government-Related Issuers](#) rating methodology, published in June 2018.

Enexis' Aa3 rating incorporates a two-notch uplift from its standalone credit quality, expressed as a Baseline Credit Assessment of a2, reflecting the likelihood of extraordinary financial support being provided by its owners, if ever required, the largest of which is the Province of Noord-Brabant with around 31%. Although the ownership of Enexis is relatively fragmented among five provinces and 88 municipalities, our assumption of strong support reflects the importance of Enexis' network operations for the regional economy, the fact that the four largest provinces together hold around 75% of the company's shares, and the strong governance framework in the Netherlands with oversight by the national government.

Our assessment of a very high level of default dependence reflects Enexis' significant exposure to the Dutch economy, as almost all of the company's revenue and cash flow are generated from domestic activities.

In addition, the Dutch government's ambitious decarbonisation agenda increases the strategic importance of Enexis to its owners, as the central government increasingly sees municipalities as partners in the energy transition.

Liquidity analysis

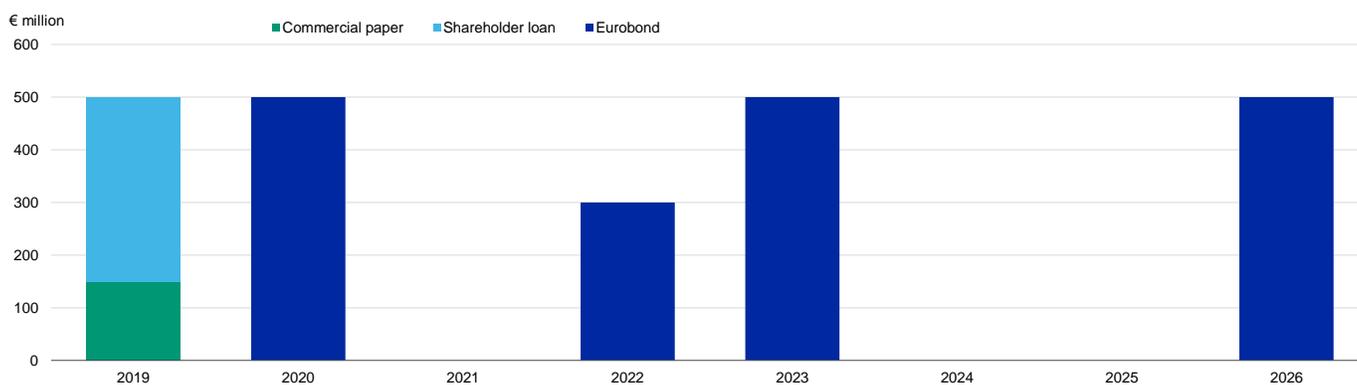

Enexis' liquidity is supported by the strong and predictable cash flow generated from its regulated network activities, a cash and cash equivalent balance of €31 million as of 31 December 2018, and available committed bank facilities. In December 2018, the company signed a new €850 million revolving credit facility maturing in December 2023, with two one-year extension options. The facility was fully undrawn as of 31 December 2018.

In December 2016, Enexis established a €1 billion commercial paper programme, which it uses to finance its short-term liquidity needs and to take advantage of the currently favourable interest rates. As of 31 December 2018, €150 million were drawn under the commercial paper programme.

Although more than 40% of Enexis' debt is maturing as of year-end 2020, we consider refinancing risk as moderate, given the increased size of its committed facilities and our expectation that the company will continue to have unrestricted access to the debt market.

Exhibit 10

More than 40% of Enexis' debt falls due in the next two years As of 31 December 2018

CREDIT RATINGS ISSUED BY MOODY'S INVESTORS SERVICE, INC. AND ITS RATINGS AFFILIATES ("MIS") ARE MOODY'S CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MOODY'S PUBLICATIONS MAY INCLUDE MOODY'S CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS AND MOODY'S OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. CREDIT RATINGS AND MOODY'S PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. NEITHER CREDIT RATINGS NOR MOODY'S PUBLICATIONS COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS AND PUBLISHES MOODY'S PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS OR MOODY'S PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER. ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing the Moody's publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$2,700,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY250,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
